

# Central platform for secure data transmission

## Fondsdepot Bank

Implementing company: **soffico GmbH**  
Client location: **Hof, Germany**  
Sector: **Finance**  
Website: **www.fondsdepotbank.de**  
Employees: **450**

The Fondsdepot Bank GmbH is the independent specialist for custom-made solutions surrounding the custody business. For more than 20 years, they've been providing competent services in investment account management with the help of around 450 experts.

### Challenges

- Replacement of all analogue input channels for customer interaction
- Salesforce as CRM system for a consistent view of the customers
- Encryption of person-related data in the Cloud
- Representation of the required performance-user-interaction
- Data model of the bank core system Diamo

### Solution

- Modular reproduction of the process communication
- Test-driven development
- Document archiving in d.3ecm via files and control files
- Webservice-layer (SOAP) for the communication with Salesforce
- Encrypted data transfer between all communication partners

## Benefits

- Easy monitoring of complex communication processes
- Agile and fast adaptability
- Combination of security, standards and customer-specific processes
- Ideally integrated into the existing IT landscape
